JURISDICTION AND VENUE

4. This action arises under the patent laws of the United States, 35 U.S.C. § 271, et seq. Plaintiff is seeking damages, as well as attorney fees and costs.

5. Jurisdiction is proper in this Court pursuant to 28 U.S.C. §§ 1331 (Federal Question) and 1338(a) (Patents).

6. This Court has personal jurisdiction over Defendant. Defendant has continuous and systematic business contacts with the State of Texas. Further, this Court has personal jurisdiction over Defendant based on its commission of one or more acts of infringement of Patents in this District and in the State of Texas.

7. Defendant directly conducts business extensively throughout the State of Texas, by distributing, making, using, offering for sale, selling, and advertising its services in the State of Texas and in this District. Defendant has purposefully and voluntarily made its business services, including the infringing systems and services, available to residents of this District and into the stream of commerce with expectation and intention that they will be purchased and/or used by consumers in this District.

8. On information and belief, Defendant retains employees specifically in this District for the purpose of servicing customers in this District, and generates substantial revenues from its business activities in this District.

9. Venue is proper in this judicial district pursuant to 28 U.S.C. § 1400(b) because, among other things, defendant is subject to personal jurisdiction in this judicial district, as it is a foreign entity such that venue is proper in this District.

PATENTS-IN-SUIT

10. Plaintiff is the sole and exclusive owner, by assignment, U.S. Patent No. 8,651,369 (hereinafter “the ’369 Patent”), and 8,936,190 (collectively “the Symbology Patents”). The ’369 Patent is attached as **Exhibit 1**, and the ’190 Patent is attached as **Exhibit 2**.

11. The Symbology Patents are valid, enforceable, and were duly issued in full compliance with Title 35 of the United States Code.

12. Plaintiff possesses all rights of recovery under the Symbology Patents, including the exclusive right to recover for past, present and future infringement.

13. The inventor of the Symbology Patents, Mr. Leigh M. Rothschild, was Chairman and Chief Executive Officer of IntraCorp Entertainment, Inc., a consumer software company with worldwide product distribution. From October 1998 through February 2004, Mr. Rothschild was also Chairman and founder of BarPoint.com, a NASDAQ publicly traded wireless company that was the leader and early creator of connecting symbology to the Internet.

14. Mr. Rothschild chairs the Rothschild Family Foundation, which endows outstanding charities and institutions around the world.

15. The '369 Patent contains twenty-eight claims including three independent claims and twenty-five dependent claims.

16. The priority date of the '369 Patent is at least as early September 15, 2010. As of the priority date, the inventions as claimed were novel, non-obvious, unconventional, and non-routine.

17. Plaintiff alleges infringement on the part of Defendant of the '369 Patent.

18. The Symbology Patents teach a system and method for enabling a portable electronic device to retrieve information about an object when the object's symbology, e.g., a barcode, is detected. *See* '369 Patent, Abstract. According to one embodiment a method is provided in which symbology associated with an object is detected and decoded to obtain a decode string. *Id.* The decode string is sent to one or more visual detection applications for processing, wherein the one or more visual detection applications reside on the portable electronic device, and receiving a first amount of information about the object from the one or more visual detection applications. *Id.*

19. As noted, the claims of the Symbology Patents have a priority date at least as early as September 15, 2010. The present invention allows for users to quickly and conveniently obtain information about an object utilizing a portable electronic device that detects symbology associated with the object. '369 Patent, 1:55-60; 2:46-54.

20. The system(s) and methods of the Symbology Patents include software and hardware that do not operate in a conventional manner. For example, the software is tailored to provide functionality to perform recited steps and the hardware (e.g., portable electronic device) is configured (and/or programmed) to provide functionality recited throughout the claims of the Symbology Patents.

21. The features recited in the claims in the Symbology Patents provide improvements to conventional hardware and software systems and methods. The improvements render the claimed inventions of the Symbology Patents non-generic in view of conventional components.

22. The features and recitations in the claims of the Symbology Patents are not those that would be well-understood, routine, or conventional to one of ordinary skill in the art at the time of the invention.

23. After conducting a search for prior art during the examination of the '369 Patent, the United States Patent Examiner identified and cited the following as the most relevant prior art references found during the search: US 2007/0216226; US 2007/0291534; US 2008/0201310; US 2009/0099961; US 2010/0280896; and US 2010/0280960.

24. After giving full proper credit to the prior art and having conducted a thorough search for all relevant art and having fully considered the most relevant art known at the time, the United States Patent Examiner allowed all of the claims of the '369 Patent to issue. In so doing, it is presumed that Examiner Trail used her knowledge of the art when examining the claims. *K/S Himpp v. Hear-Wear Techs., LLC*, 751 F.3d 1362, 1369 (Fed. Cir. 2014). It is further presumed that Examiner Trail had experience in the field of the invention, and that the Examiner properly acted in accordance with a person of ordinary skill. *In re Sang Su Lee*, 277 F.3d 1338, 1345 (Fed. Cir. 2002). In view of the foregoing, the claims of the '369 Patent are novel and non-obvious, including over all non-cited art which is merely cumulative with the referenced and cited prior art. Likewise, the claims of the '752 Patent are novel and non-obvious, including over all non-cited contemporaneous state of the art systems and methods, all of which would have been known to a

person of ordinary skill in the art, and which were therefore presumptively also known and considered by Examiner Trail.

25. The claims of the '369 Patent were all properly issued, and are valid and enforceable for the respective terms of their statutory life through expiration, and are enforceable for purposes of seeking damages for past infringement even post-expiration. *See, e.g., Genetics Institute, LLC v. Novartis Vaccines and Diagnostics, Inc.*, 655 F.3d 1291, 1299 (Fed. Cir. 2011) (“[A]n expired patent is not viewed as having ‘never existed.’ Much to the contrary, a patent does have value beyond its expiration date. For example, an expired patent may form the basis of an action for past damages subject to the six-year limitation under 35 U.S.C. § 286”) (internal citations omitted).

26. The '369 Patent was examined by Primary United States Patent Examiner Allyson Trail. During the examination of the '369 Patent, the United States Patent Examiner searched for prior art in the following US Classifications: 235/375; 235/379; 705/14.1; 709/39; and 709/80.

27. After conducting a search for prior art during the examination of the '369 Patent, the United States Patent Examiner identified and cited the following as the most relevant prior art references found during the search: US 2007/0216226; US 2007/0291534; US 2008/0201310; US 2009/0099961; US 2010/0280896; and US 2010/0280960.

28. After giving full proper credit to the prior art and having conducted a thorough search for all relevant art and having fully considered the most relevant art known at the time, the United States Patent Examiner allowed all of the claims of the '369 Patent to issue. In so doing, it is presumed that Examiner Trail used her knowledge of the art when examining the claims. *K/S Himpp v. Hear-Wear Techs., LLC*, 751 F.3d 1362, 1369 (Fed. Cir. 2014). It is further presumed that Examiner Trail had experience in the field of the invention, and that the Examiner properly acted in accordance with a person of ordinary skill. *In re Sang Su Lee*, 277 F.3d 1338, 1345 (Fed. Cir. 2002). In view of the foregoing, the claims of the '369 Patent are novel and non-obvious, including over all non-cited art which is merely cumulative with the referenced and cited prior art. Likewise, the claims of the '369 Patent are novel and non-obvious, including over all non-cited

contemporaneous state of the art systems and methods, all of which would have been known to a person of ordinary skill in the art, and which were therefore presumptively also known and considered by Examiner Trail.

29. The claims of the '369 Patent were all properly issued, and are valid and enforceable for the respective terms of their statutory life through expiration, and are enforceable for purposes of seeking damages for past infringement even post-expiration. *See, e.g., Genetics Institute, LLC v. Novartis Vaccines and Diagnostics, Inc.*, 655 F.3d 1291, 1299 (Fed. Cir. 2011) (“[A]n expired patent is not viewed as having ‘never existed.’ Much to the contrary, a patent does have value beyond its expiration date. For example, an expired patent may form the basis of an action for past damages subject to the six-year limitation under 35 U.S.C. § 286”) (internal citations omitted).

30. The nominal expiration date for the claims of the '369 Patent is no earlier than September 15, 2030.
